Tel.: 9771 400 829 | 9006 219 390 | **TIMING** : 7:00 A.M. to 7:00 P.M. | **SUNDAY** : 7:00 A.M. to 2:00 P.M.

Patient Name : **MRS. SUDINA SATYANARAYAN JHA** Pat.UID/Bill.ID : 123290 / 162675
Age / Sex : 52 years / Female Registration On : 24/06/2021, 11:58 AM
Ref. Doctor : SELF Sample Coll. On : 24/06/2021, 11:58 AM
Center Name : BINDU DIAGNOSTICS PVT LTD: Reported On : 24/06/2021, 07:20 PM
Sample ID 2113102916

MOLECULAR TEST REPORT

Investigations

Result(s)

COVID-19 REAL TIME RT-PCR *

COVID-19 Real Time RT-PCR

Negative

RESULT	INTERPRETATION
Positive	RNA specific to SARS-CoV-2 Detected
Negative	RNA specific to SARS-CoV-2 Not Detected

Note

- ICMR Registration number for Covid-19 Real Time RT-PCR is BDPLALDB.
- Negative result does not rule out the possibility of Covid-19 infection. Presence of inhibitors, mutations & insufficient RNA specific to SARS-CoV-2 can influence the test result. Kindly correlate the results with clinical findings. A negative result in a single upper respiratory tract sample does not rule out SARS-CoV-2 infection.
- Covid-19 Test conducted as per kits approved by ICMR / CE-IVD / USFDA.
- Test conducted on Nasopharyngeal Swab.

Comments:-

Coronaviruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV). Coronavirus COVID-19 is a new strain that was discovered in 2019 and has not been previously identified in human. Common signs of infection include respiratory symptoms, fever, cough, shortness of breath and breathing difficulties. In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome and kidney failure.

Severe cases should be further investigated for Corona Markers (IL-6, Procalcitonin, D-Dimer, Serum Ferritin, Serum LDH, High Sensitive CRP, High Sensitive Troponin I etc.) for better treatment outcome.
